

## PROJECT PROFILE – TSB FLAGSHIP REFIT

Between 2017 and 2018 we worked on a full new flagship fit-out project on behalf of our client, TSB. During the 12-week project period we transformed an old Nike store located in the centre of Manchester into a hi-tech retail and office banking location.

Working to the specific requirements of our client, we completed a full power installation including multimedia equipment, section and distribution boards, fitted internal ATM's and supplied new lighting throughout the building.

We also installed new air conditioning and ventilation systems and refitted the toilet facilities, to make them of a more modern quality.

We received positive feedback from our client who liked the results so much that they have since contracted us to complete further works on their various other projects throughout the UK.

**CLIENT: TSB**

**VALUE: £350,000**

**CONTRACT LENGTH: 25 WEEKS**

**SERVICES: MECHANICAL AND ELECTRICAL REFIT**

**SECTOR: RETAIL BANKING**
