

## PROJECT PROFILE – HUGO BOSS, CARDIFF

HUGO BOSS is one of the market leaders in the premium and luxury segment of the global apparel market. It focuses on the developing and marketing of premium fashion and accessories for men and women. This image is showcased in its various stores located worldwide.

DL M&E Building Services were engaged to undertake both the full mechanical and electrical work at Hugo Boss, St David's Shopping Centre, Cardiff

Distribution boards, power, LED bespoke lighting, along with the installation of an integrated fire alarm system, CCTV and audio systems were installed throughout the retail store.

New air-conditioning and ventilations systems were installed, with DX VRV fan coil units supplying air through linear grills, mounted within the MF ceilings to maintain a sleek look.

Domestic services were installed for the new toilet area, along with new sanitaryware.

In order to negate any unnecessary disruption to store trading, DL M&E also undertook the mechanical and electrical installation works for temporary premises which Hugo Boss utilised whilst the refurbishment was being undertaken.
