

PROJECT PROFILE – NATWEST ATM ROLLOUT

Natwest was launched in 1970 but traces its origins to more than 200 smaller banks founded in communities all over England and Wales. They were all different – large and small, city and country, traditional and innovative – and grew to serve the banking needs of unique communities all over the United Kingdom.

DL M&E Building Services were selected to undertake 50 ATM projects. The Scope of works was to install electrical supplies for new ATMs throughout the UK, mainly within train stations.

The ATMS were mostly installed in isolated locations in train stations. DL M&E Building Services were responsible for reviewing the current installation, assessing the required electrical load, installing power to the LED lighting, and providing a coordinated and detailed design for the work.

Due to a changing programme of works, DL M&E Building Services provided attendance on a reactive basis with short lead-in times.

All the work undertaken was completed and certified to NICEIC standards in-line with the project programme and to the ultimate satisfaction of the client.

- DL** CLIENT: **ROYAL BANK OF SCOTLAND**
- DL** VALUE: **£150K**
- DL** CONTRACT LENGTH: **52 WEEKS**
- DL** SERVICES: **ELECTRICAL INSTALLATION**
- DL** SECTOR: **BANKING**
